Nkechi Anna Ahanonye

Cloud & DevOps Engineer

Lagos, Nigeria | nahanonye@gmail.com | linkedin.com/in/nkechiahanonye | github.com/nkydigitech | nkydigitech.carrd.co

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with hands-on experience designing, deploying, and automating AWS infrastructure for real-world environments. I work with Terraform, Ansible, Docker, Kubernetes, and CI/CD pipelines to eliminate manual processes, reduce configuration drift, and give teams full ownership of what's been built — long after I've left. My background as a teacher means I document everything, explain clearly, and make complex systems accessible. I'm open to Cloud Engineering, DevOps, SRE, and Platform Engineering roles across any sector — remote or Lagos-based.

CORE TECHNICAL SKILLS

Cloud & AWS	EC2, RDS, VPC, IAM, ALB, S3 — production-grade infrastructure deployment
IaC & Config	Terraform (3-tier architecture, 33 resources), Ansible (roles & playbooks)
Containers	Docker, Kubernetes — containerisation, orchestration, multi-service apps
CI/CD	GitHub Actions, CI/CD pipelines — automated build, test, deploy workflows
Scripting	Bash, Python — automation scripts, operational task reduction
Monitoring	Datadog — alerting, uptime tracking, early issue detection
Networking	Linux, Ubuntu, Nginx, MySQL, SSH, VPNs, security groups, firewall config
Soft Skills	Technical documentation, mentorship, incident triage, cross-team collaboration

PROFESSIONAL EXPERIENCE

Cloud & DevOps Engineer
CloudAdvisory Oy (DMI Program)

Feb 2026 – Present
Remote

- Designed, deployed, and managed scalable AWS infrastructure — EC2, RDS, VPCs, and Application Load Balancers — supporting live application environments with high availability requirements.
- Built and maintained automated CI/CD pipelines using GitHub Actions, reducing deployment time by ~60% and eliminating manual release errors.
- Automated server provisioning and multi-service application deployments using Ansible roles and playbooks, removing repetitive manual configuration entirely.
- Resolved production-level Nginx, MySQL, and SSH connectivity issues on live Ubuntu 22.04 EC2 instances — real incident triage, not simulated.
- Implemented IAM policies, security groups, and VPC configurations following AWS security best practices.
- Documented every deployment, configuration decision, and runbook so teams retain full ownership after handover.

Stack: AWS (EC2, RDS, VPC, IAM, ALB) · Terraform · Ansible · Docker · CI/CD · GitHub Actions · Bash · Python · Linux · Nginx · MySQL

Cloud & DevOps Engineer
Digital Witch Support Community

Feb 2025 – Sep 2025
Remote

- Automated infrastructure provisioning and deployment workflows using Terraform, Docker, and GitHub — reducing manual environment setup time by 40%.
- Configured and managed scalable Kubernetes environments on AWS for high availability and resilience across containerised multi-service applications.
- Implemented Datadog monitoring and alerting, improving early issue detection and reducing simulated downtime across environments.
- Supported WordPress + MySQL production-like deployments, applying DevOps best practices to reduce deployment errors by 25%.
- Created detailed technical documentation and simplified onboarding guides, cutting new member ramp-up time by 30%.
- Engineered offline-first CI/CD workflows to maintain consistent deployment capability under unreliable network conditions.

Stack: AWS · Kubernetes · Docker · Terraform · Ansible · Datadog · Git/GitHub · MySQL · WordPress · Linux · CI/CD

AI Integration & Automation Specialist
ALX Nigeria

Apr 2024 – May 2025
Remote

- Automated repetitive workflows by integrating AI tools — ChatGPT, Notion AI, Zapier — saving several hours per week in scheduling, reporting, and documentation tasks.
- Built and optimised AI-powered systems using prompt engineering to streamline content creation, data organisation, and task management.
- Applied responsible AI practices to create scalable, ethical automation solutions — early foundation for the agentic DevOps work that followed.

Teacher | Mentor | Educator
Beacon Starkids School

Aug 2022 – Sep 2025
Lagos, On-site

- Mentored students through one-on-one guidance — communication and teaching skills now applied in DevOps to onboard team members, write documentation, and troubleshoot collaboratively.
- Managed structured learning environments for diverse groups across 3 years — adaptability and cross-functional collaboration skills directly transferable to fast-paced engineering teams.

Sales & Customer Operations Manager
Neighbourhood Communications

Aug 2016 – Sep 2022
Lagos, On-site

- Led a sales team to grow revenue by 25% through relationship-building and solution-based selling — stakeholder communication and strategic planning skills now applied to DevOps project delivery.
- Designed task-assignment and client-tracking systems using Excel, improving team workflow efficiency — early hands-on experience in process optimisation that carries into infrastructure automation.

KEY PROJECTS

3-Tier AWS Architecture with Terraform · *github.com/nkydigitech*

- Designed and deployed a full 3-tier AWS infrastructure (EC2 + RDS + ALB) using Terraform — 33 resources, zero manual provisioning. Covers VPC, security groups, IAM, and auto-scaling.

Ansible Multi-Play Deployment (EpicBook App)

- Built full application deployment using Ansible roles — provisioning, Nginx configuration, MySQL setup, and app deployment in a single automated pipeline. Debugged real Nginx 403/502 errors and MySQL socket authentication issues in production.

Agentic DevOps Knowledge Base Builder

- Built a Python-based AI agent using Groq's Llama model and the Notion API to auto-generate structured DevOps knowledge base entries — submitted to the Notion MCP Challenge on DEV.to.

Docker Multi-Tier Deployment (Book Review App)

- Deployed a multi-service book review application using Docker in GitHub Codespaces. Resolved CORS issues, Next.js SSR vs client-side fetching conflicts, and Codespaces port visibility problems.

EDUCATION & CERTIFICATIONS

Bachelor of Business Administration · University of Lagos	Sep 2010 – Dec 2014
DevOps & Cloud Engineering Certification · CloudAdvisory Oy / DMI Program	2025 – 2026
Cloud Computing & DevOps Certification · Digital Witch IT Support Community	Feb – Sep 2025
Practical GitHub Actions · 2025	

All project work publicly documented — github.com/nkydigitech · nkydigitech.carrd.co · Open to remote and Lagos-based roles
