

Nkechi Anna Ahanonye

Cloud & DevOps Engineer

Lagos, Nigeria | nahanonye@gmail.com | linkedin.com/in/nkechiahanye | github.com/nkydigitech | nkydigitech.github.io/nky-portfolio

PROFESSIONAL SUMMARY

15 years running a cybercafe taught me a critical lesson that became my guiding principle: real users don't care about your stack; they care that things just work. The journey, from managing physical machines to automating complex cloud infrastructure, ignited my drive as a **Cloud & DevOps Engineer**.

Today, I empower teams to stop firefighting deployments and start shipping reliably, building resilient systems that don't break at 2 AM. I leverage Terraform, Ansible, Docker, Kubernetes, and CI/CD pipelines to eliminate manual processes, reduce configuration drift, and ensure maintainability. My background as an educator also ensures I excel in technical documentation, clear communication, and making complex systems accessible.

Seeking impactful **Cloud Engineering, DevOps, SRE, or Platform Engineering** roles.

CORE TECHNICAL SKILLS

Cloud & AWS	EC2, RDS, VPC, IAM, ALB, S3 — Designing & deploying production-grade infrastructure
IaC & Config	Terraform (3-tier architecture, 33 resources), Ansible (roles & playbooks, multi-service deployments)
Containers	Docker, Kubernetes — Containerization, orchestration, scalable multi-service applications
CI/CD	GitHub Actions, Jenkins – Automated build, test, and deploy workflows
Scripting	Bash, Python – Automation scripts, operational task reduction, API integrations
Monitoring	Datadog – Alerting, uptime tracking, proactive incident detection
Networking & OS	Linux (Ubuntu), Nginx, MySQL, SSH, VPNs, security groups, firewall configuration
Soft Skills	Technical Documentation, Mentorship, Incident Triage, Cross-team Collaboration, Problem Solving

PROFESSIONAL EXPERIENCE

Cloud & DevOps Engineer CloudAdvisory Oy (DMI Program)	Feb 2026 – Present Remote
- Designed, deployed, and managed scalable AWS infrastructure (EC2, RDS, VPCs, ALBs) supporting live application environments with high availability. - Built and maintained automated CI/CD pipelines using GitHub Actions, reducing deployment time by ~60% and eliminating manual release errors. - Automated server provisioning and multi-service application deployments using Ansible roles and playbooks, removing repetitive manual configuration entirely. - Resolved production-level Nginx, MySQL, and SSH connectivity issues on live Ubuntu 22.04 EC2 instances, demonstrating real incident triage. - Implemented IAM policies, security groups, and VPC configurations following AWS security best practices. - Documented all deployments, configuration decisions, and runbooks to ensure team ownership and maintainability.	

Stack: AWS (EC2, RDS, VPC, IAM, ALB) · Terraform · Ansible · Docker · CI/CD · GitHub Actions · Bash · Python · Linux · Nginx · MySQL

Cloud & DevOps Engineer
Digital Witch Support Community

Feb 2025 – Sep 2025
Remote

- Automated infrastructure provisioning and deployment workflows using Terraform, Docker, and GitHub, reducing manual environment setup time by 40%.
- Configured and managed scalable Kubernetes environments on AWS for high availability and resilience of containerized multi-service applications.
- Implemented Datadog monitoring and alerting, improving early issue detection and reducing simulated downtime across environments.
- Supported WordPress + MySQL production-like deployments, applying DevOps best practices to reduce deployment errors by 25%.
- Engineered offline-first CI/CD workflows to maintain consistent deployment capability under unreliable network conditions.
- Created detailed technical documentation and simplified onboarding guides, cutting new member ramp-up time by 30%.

Stack: AWS · Kubernetes · Docker · Terraform · Ansible · Datadog · Git/GitHub · MySQL · WordPress · Linux · CI/CD

AI Integration & Automation Specialist
ALX Nigeria

Apr 2024 – May 2025
Remote

- Automated repetitive workflows by integrating AI tools (ChatGPT, Notion AI, Zapier), saving 5-10 hours per week in scheduling, reporting, and documentation tasks.
- Built and optimized AI-powered systems using prompt engineering to streamline content creation, data organization, and task management.
- Applied responsible AI practices to create scalable, ethical automation solutions, laying foundations for advanced agentic DevOps work.

Teacher | Mentor | Educator
Beacon Starkids School

Aug 2022 – Sep 2025
Lagos, On-site

- Taught English and Science subjects to pupils transitioning to secondary school, developing exceptional communication and simplification skills crucial for explaining complex concepts, now applied to technical documentation and diverse team collaboration.
- Managed structured learning environments for diverse student groups over 3 years, demonstrating strong adaptability, organizational capabilities, and problem-solving in dynamic situations.

Sales & Customer Operations Manager
Neighbourhood Communications

Aug 2016 – Sep 2022
Lagos, On-site

- Led a sales team to grow revenue by 25%, applying strong stakeholder communication and strategic planning to project delivery in engineering.
- Designed client-tracking and task-assignment systems using Excel, improving team workflow efficiency and demonstrating early process optimization skills.

KEY PROJECTS

3-Tier AWS Architecture with Terraform · github.com/nkydigitech

- Designed and deployed a full 3-tier AWS infrastructure (EC2 + RDS + ALB) using Terraform – 33 resources provisioned automatically, achieving zero manual setup. Includes VPC, security groups, IAM, and auto-scaling.

Ansible Multi-Play Deployment (EpicBook App)

- Developed full application deployment using Ansible roles for provisioning, Nginx configuration, MySQL setup, and app deployment in a single automated pipeline. Successfully debugged and resolved real Nginx 403/502 errors and MySQL socket authentication issues in production-like environments.

Agentic DevOps Knowledge Base Builder

- Built a Python-based AI agent leveraging Groq's Llama model and the Notion API to auto-generate structured DevOps knowledge base entries. Submitted to the Notion MCP Challenge on DEV.to.

Docker Multi-Tier Deployment (Book Review App)

- Deployed a multi-service book review application using Docker in GitHub Codespaces. Resolved critical issues including CORS, Next.js SSR vs client-side fetching conflicts, and Codespaces port visibility.

EDUCATION & CERTIFICATIONS

Bachelor of Business Administration | University of Lagos | Sep 2010 – Dec 2014

Build AI Agents for Business: Automate Work Without Coding | Udemy | 2026

Ultimate Agentic AI DevOps with Claude Code | Udemy | 2026

DevOps & Cloud Engineering Certification | CloudAdvisory Oy / DMI Program | 2025 – 2026

Cloud Computing & DevOps Certification | Digital Witch IT Support Community | Feb – Sep 2025

Practical GitHub Actions | [Udemy] | 2025

All project work publicly documented — github.com/nkydigitech · nkydigitech.github.io/nky-portfolio · Open to remote and Lagos-based roles
