

Nkechi Anna Ahanonye

Cloud & DevOps Engineer | I turn 3 AM-breaking deployments into 1-min pipelines with AWS + Ansible + Terraform | Building security-first AI agents on Amazon Bedrock AgentCore | AI Governance on AWS certified

Lagos, Nigeria | nahanonye@gmail.com | linkedin.com/in/nkechiahanonye | github.com/nkydigitech (99 public repos) | nkydigitech.github.io/nky-

PROFESSIONAL SUMMARY

15 years running a high-pressure cybercafe taught me something I still carry into every deployment: real users don't care about your stack. They care that things just work. That mindset pulled me from managing physical machines into automating cloud infrastructure, and it is why I build systems that do not break at 3 AM.

I work with Terraform, Ansible, Docker, Kubernetes, and CI/CD pipelines to eliminate manual processes and keep deployments predictable. Ansible is where I have gone deepest - full multi-service deployment pipelines with roles and playbooks, real Nginx and MySQL production debugging, and a free Ansible Lab plus 15-module masterclass that engineers across Africa are actually using.

In 2026 I took that discipline to Agentic AI: security-first agents on Amazon Bedrock AgentCore with SigV4 and OAuth2 M2M tool authentication, per-request tool authorization via Amazon Verified Permissions, and agents architected to decline rather than guess. AI Governance on AWS certified (BeSA Agentic AI Batch 10). It is a rare combination, and it is where DevOps is heading.

Open to remote Cloud Engineering, DevOps, SRE, and Platform Engineering roles. Also available for consulting and training partnerships.

CORE TECHNICAL SKILLS

Cloud & AWS: EC2, RDS, VPC, IAM, ALB, S3, EKS, Aurora - production infrastructure design and deployment

IaC & Config: Terraform (3-tier architecture, 33 resources), Ansible (roles, playbooks, multi-service deployments)

Containers: Docker, Kubernetes (EKS, k3s, self-healing clusters, GitOps with ArgoCD)

CI/CD: GitHub Actions, Jenkins - automated build, test, deploy workflows (6-guard pipeline: lint, syntax-check, dry-run, deploy)

Agentic AI: Amazon Bedrock AgentCore, Strands, Claude, Lambda, MCP (Model Context Protocol), Amazon Verified Permissions, SigV4/OAuth2 M2M, Step Functions, EventBridge

Scripting: Bash, Python - automation scripts, API integrations, AI agents

Monitoring: Datadog, Prometheus, Grafana - alerting, uptime tracking, proactive incident detection

OS & Networking: Linux (Ubuntu), Nginx, MySQL, SSH, VPNs, security groups, firewall configuration

PROFESSIONAL EXPERIENCE

Cloud & DevOps Engineer - CloudAdvisory Oy (DMI Program)

Feb 2026 - Present | Remote

- Designed, deployed, and managed scalable AWS infrastructure (EC2, RDS, VPCs, ALBs) supporting live application environments with high availability
- Built and maintained CI/CD pipelines using GitHub Actions, cutting deployment time by ~60% and eliminating manual release errors (2m 11s manual failure -> 1m 18s automated pipeline)
- Automated server provisioning and multi-service application deployments using Ansible roles and playbooks
- Resolved production-level Nginx, MySQL, and SSH connectivity issues on live Ubuntu 22.04 EC2 instances
- Implemented IAM policies, security groups, and VPC configurations following AWS security best practices
- Co-mentored 30+ engineers across Africa; audited 40+ IaC repositories for production-grade quality

Stack: AWS (EC2, RDS, VPC, IAM, ALB) | Terraform | Ansible | Docker | GitHub Actions | Bash | Python | Linux | Nginx | MySQL

Cloud & DevOps Engineer - Digital Witch Support Community

Feb 2025 - Sep 2025 | Remote

- Automated infrastructure provisioning and deployment workflows using Terraform, Docker, and GitHub, reducing manual environment setup time by 40%
- Configured and managed scalable Kubernetes environments on AWS for high availability of containerized multi-service applications
- Implemented Datadog monitoring and alerting, improving early issue detection and reducing simulated downtime across environments
- Engineered offline-first CI/CD workflows that maintained consistent deployment capability under unreliable network conditions
- Created technical documentation and onboarding guides that cut new member ramp-up time by 30%

Stack: AWS | Kubernetes | Docker | Terraform | Ansible | Datadog | Git/GitHub | MySQL | WordPress | Linux | CI/CD

AI Integration & Automation Specialist - ALX Nigeria

Apr 2024 - May 2025 | Remote

- Automated repetitive workflows by integrating AI tools (ChatGPT, Notion AI, Zapier), saving 5-10 hours per week in scheduling, reporting, and documentation
- Built AI-powered systems using prompt engineering to streamline content creation, data organization, and task management
- Applied responsible AI practices to create scalable, ethical automation solutions - the foundation of my current agentic DevOps work

Teacher | Mentor | Educator - Beacon Starkids School

Aug 2022 - Sep 2025 | Lagos, On-site

- Taught English and Science to pupils transitioning to secondary school - developed the communication and simplification skills I now use for technical documentation and cross-team work

Sales & Customer Operations Manager - Neighbourhood Communications

Aug 2016 - Sep 2022 | Lagos, On-site

- Led a sales team to grow revenue by 25%, applying stakeholder communication and strategic planning skills that transfer directly to engineering project delivery
- Designed client-tracking and task-assignment systems - early process optimization that became infrastructure automation

KEY PROJECTS

agentcode - Security-First AI Agent on Amazon Bedrock AgentCore github.com/nkydigitech/agentcode

Strands agent running Claude Opus 4.6 on AWS Bedrock AgentCore - every tool call secured with a different auth pattern (SigV4, OAuth2 M2M), per-request tool authorization via Amazon Verified Permissions, architected to decline rather than guess. Built from the AWS re:Invent SEC307 security workshop; deployed on live AWS with 64 real console screenshots.

Production-Ready AI Agents on EKS github.com/nkydigitech/production-ready-ai-agents-eks

Multi-agent AI system on Kubernetes - 7 agents (customer, supervisor, RAG, memory, knowledge-graph, MCP, strands) deployed to both minikube and a real AWS EKS cluster. Cost-guard discipline kept the entire project at \$0.55 of a \$1.00 budget.

Serverless Agentic AI - Choreography vs Orchestration github.com/nkydigitech/aws-serverless-agentic-ai

Event-driven agent patterns on AWS serverless - EventBridge choreography vs Step Functions orchestration, with Lambda agents in Python. Two working architectures with honest trade-offs documented.

CloudMart - GitOps E-Commerce on Kubernetes github.com/nkydigitech/cloudmart

Cloud-native e-commerce on Minikube - Docker, ArgoCD, NGINX Ingress, FastAPI, PostgreSQL 15, Jumia-style UI with real images and Naira prices. Full GitOps-synced store with live demo.

Ballot Trust 360 - Nigerian Election Trust Suite github.com/nkydigitech/ballot-trust-360-nigeria

Complete civic trust platform built for Hackaholics 7.0 - automatic accreditation, EC8A result-sheet verification, AI-generated fictional candidates. All Nigerian Edition.

Ansible CI/CD Pipeline - 2m 11s failed -> 1m 18s passed github.com/nkydigitech/ansible_practical

GitHub Actions pipeline with 6 guards: yamllint, ansible-lint, shellcheck, syntax-check, dry-run (--check --diff), auto-deploy. Template reused as team standard. Zero SSH into prod.

Ansible Lab + 15-Module Ansible Masterclass nkydigitech.github.io/ansible-lab | nkydigitech.github.io/ansible-guide

Free Ansible training built from real production debugging (Nginx 403/502, MySQL socket issues). Used by engineers across Africa to go beyond tutorials and actually deploy.

GEORGEL Cancer Foundation NGO App georgelcancerfoundation.org

Built and maintained a production application for the GEORGEL Cancer Foundation in collaboration with Jos University Teaching Hospital (JUTH) and the Ministry of Health. 99.9% uptime - real patient data, available around the clock.

EDUCATION & CERTIFICATIONS

AI Governance on AWS - Certified BeSA Agentic AI Batch 10 (AWS) | Sep 2026

Bachelor of Business Administration University of Lagos | Sep 2010 - Dec 2014

DevOps & Cloud Engineering Certification CloudAdvisory Oy / DMI Program | 2025 - 2026

Cloud Computing & DevOps Certification Digital Witch IT Support Community | Feb - Sep 2025

Build AI Agents for Business: Automate Work Without Coding Udemy | 2026

Ultimate Agentic AI DevOps with Claude Code Udemy | 2026

Practical GitHub Actions Udemy | 2025

All project work publicly documented - github.com/nkydigitech | nkydigitech.github.io/nky-portfolio | Open to remote and Lagos-based roles
