

Nkechi Anna Ahanonye

Cloud & DevOps Engineer | I turn 3 AM-breaking deployments into 1-min pipelines with AWS + Ansible + Terraform | Building security-first AI agents on Amazon Bedrock AgentCore | AI Governance on AWS certified

Lagos, Nigeria (UTC+1) | nahanonye@gmail.com | linkedin.com/in/nkechiahanye | github.com/nkydigitech - 99 public repos | nkydigitech.github.io

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 15+ years in IT operations - from running a high-pressure Lagos cybercafe to automating production cloud infrastructure. I build systems that do not break at 3 AM: 1-minute CI/CD pipelines (lint, dry-run, deploy) with GitHub Actions, Ansible and Terraform, replacing manual SSH deployments that failed in 2m 11s with automated runs passing in 1m 18s.

Now building security-first agentic AI on Amazon Bedrock AgentCore - SigV4 and OAuth2 M2M tool authentication, per-request authorization via Amazon Verified Permissions, agents architected to decline rather than guess. AI Governance on AWS certified (BeSA Batch 10). Open to remote Cloud Engineering, DevOps, SRE and Platform Engineering roles.

CORE TECHNICAL SKILLS

Cloud & AWS: EC2, RDS, Aurora, VPC, IAM, ALB, S3, EKS, Cognito, Secrets Manager - production-grade infrastructure

IaC: Terraform (3-tier, 33 resources, modules), Ansible (roles, playbooks, Vault, dynamic inventory)

Containers & Orchestration: Docker, Kubernetes (EKS, k3s, self-healing clusters, GitOps with ArgoCD, NGINX Ingress)

CI/CD: GitHub Actions, Jenkins - 6-guard pipeline: yamllint, ansible-lint, shellcheck, syntax-check, dry-run, deploy

Agentic AI: Amazon Bedrock AgentCore, Strands, Claude, Lambda, Step Functions, EventBridge, MCP, Amazon Verified Permissions

Monitoring: Datadog, Prometheus, Grafana - alerting, uptime tracking, proactive incident detection

Scripting & OS: Python, Bash, Linux (Ubuntu), Nginx, MySQL, SSH, security groups, VPNs

PROFESSIONAL EXPERIENCE

Cloud & DevOps Engineer - CloudAdvisory Oy (DMI Program)

Feb 2026 - Present | Remote

- Designed and deployed scalable AWS infrastructure (EC2, RDS, VPC, ALB) supporting live application environments with high availability
- Built GitHub Actions CI/CD pipelines cutting deployment time by ~60% (2m 11s manual failure -> 1m 18s automated) and eliminating manual release errors
- Automated server provisioning and multi-service deployments with Ansible roles and playbooks; resolved real Nginx 403/502 and MySQL socket issues on live Ubuntu 22.04 EC2 instances
- Implemented IAM policies, security groups and VPC configurations following AWS security best practices
- Co-mentoring 30+ engineers across Africa; audited 40+ IaC repositories for production-grade quality

Stack: AWS (EC2, RDS, VPC, IAM, ALB) | Terraform | Ansible | Docker | GitHub Actions | Python | Bash | Linux

Cloud & DevOps Engineer - Digital Witch Support Community

Feb 2025 - Sep 2025 | Remote

- Automated infrastructure provisioning with Terraform, Docker and GitHub - cut manual environment setup time by 40%
- Configured and managed Kubernetes environments on AWS for HA of containerized multi-service applications
- Implemented Datadog monitoring and alerting, improving early issue detection across environments; cut deployment errors by 25%
- Engineered offline-first CI/CD workflows and documentation that cut new member ramp-up time by 30%

Stack: AWS | Kubernetes | Docker | Terraform | Ansible | Datadog | Git/GitHub | MySQL | Linux

AI Integration & Automation Specialist - ALX Nigeria

Apr 2024 - May 2025 | Remote

- Automated repetitive workflows with AI tools (ChatGPT, Notion AI, Zapier), saving 5-10 hours weekly in scheduling, reporting and documentation
- Built AI-powered systems with prompt engineering; applied responsible AI practices - the foundation of my current agentic DevOps work

Earlier Career

Aug 2016 - Sep 2025 | Lagos

- Teacher | Mentor - Beacon Starkids School (2022-2025): taught English and Science; built the communication skills behind my technical documentation and DMI mentoring
- Sales & Customer Operations Manager - Neighbourhood Communications (2016-2022): led a sales team to 25% revenue growth; designed client-tracking systems - my first process automation

KEY PROJECTS

agentcode - Security-First AI Agent on Amazon Bedrock AgentCore github.com/nkydigitech/agentcode

Strands agent running Claude Opus 4.6 on AWS Bedrock AgentCore - every tool call secured with a different auth pattern (SigV4, OAuth2 M2M), per-request tool authorization via Amazon Verified Permissions. Built from the AWS re:Invent SEC307 workshop; deployed on live AWS, documented with 64 console screenshots.

Production-Ready AI Agents on EKS github.com/nkydigitech/production-ready-ai-agents-eks

Multi-agent system on Kubernetes - 7 agents (customer, supervisor, RAG, memory, knowledge-graph, MCP, strands) deployed to minikube and a real AWS EKS cluster, with cost-guard discipline that kept the entire project at \$0.55 of a \$1.00 budget.

Serverless Agentic AI - Choreography vs Orchestration github.com/nkydigitech/aws-serverless-agentic-ai

Event-driven agent patterns on AWS serverless - EventBridge choreography vs Step Functions orchestration with Lambda agents in Python; honest trade-offs documented.

CloudMart - GitOps E-Commerce on Kubernetes github.com/nkydigitech/cloudmart

Cloud-native e-commerce on Minikube - Docker, ArgoCD, NGINX Ingress, FastAPI, PostgreSQL 15, Jumia-style UI with Naira prices; fully GitOps-synced with live demo.

Ballot Trust 360 - Nigerian Election Trust Suite github.com/nkydigitech/ballot-trust-360-nigeria

Civic trust platform built for Hackaholics 7.0 - automatic accreditation, EC8A result-sheet verification, AI-generated fictional candidates. All Nigerian Edition.

Ansible CI/CD Pipeline - 2m 11s failed -> 1m 18s passed github.com/nkydigitech/ansible_practical

GitHub Actions pipeline with 6 guards (yamllint, ansible-lint, shellcheck, syntax-check, dry-run, auto-deploy). Template reused as team standard. Zero SSH into prod.

Teaching: Ansible Lab + 15-Module Masterclass + DevOps Learning Hub nkydigitech.github.io/ansible-lab

Free hands-on Ansible training built from real production debugging, a 15-module masterclass with real terminal output, and a 4-phase DevOps curriculum ending in Agentic AI + MCP. Used by engineers across Africa.

GEORGEL Cancer Foundation - Production NGO Deployment georgelcancerfoundation.org

Built and maintained the production website for a Nigerian cancer advocacy foundation in collaboration with JUTH and the Ministry of Health - 99.9% uptime, real patient-facing availability.

EDUCATION & CERTIFICATIONS

AI Governance on AWS - Certified BeSA Agentic AI Batch 10 (AWS) | Sep 2026

Bachelor of Business Administration University of Lagos | 2010 - 2014

DevOps & Cloud Engineering Certification CloudAdvisory Oy / DMI Program | 2025 - 2026

Cloud Computing & DevOps Certification Digital Witch IT Support Community | 2025

Ultimate Agentic AI DevOps with Claude Code Udemy | 2026

Build AI Agents for Business Udemy | 2026

All project work publicly documented: github.com/nkydigitech | nkydigitech.github.io/nky-portfolio | Open to remote and Lagos-based roles
